

Navilyst Medical Consolidates Product Data and Quality Systems with Agile PLM

Company Overview

- Navilyst Medical strives to be the first choice provider of medical devices for vascular access, and the diagnosis and treatment of vascular disease
- Industry: Medical Device
- Employees: 800

Challenges/Opportunities

- Accelerate time to market for Navilyst's products that require regulatory approval
- Extract and consolidate device master information from legacy PLM and migrate to Agile PLM
- Provide easy access to data to meet ISO, US FDA, and CAPA audit and compliance requirements

Solution

- Implemented Oracle's Agile PLM via J-Squared Technologies AAIM implementation methodology
- Agile Product Collaboration
 - Agile Product Quality Management

Customer Perspective

Results

- Implemented controls to protect data from changes or errors
- Increased FDA/ISO auditor's confidence with instantly available data
- Improved visibility to quality data for users in various departments
- Improved ability to meet regulatory requirements, NPI cycle, and quality
- Increased time to value with proven J-Squared Technologies Agile Accelerated Implementation Methodology (AAIM)

Oracle Accelerate
